

# Add pull request trigger

The screenshot shows the Bitrise web interface with the 'Triggers' tab selected. The top navigation bar includes 'Workflows', 'Code Signing', 'Secrets', 'Env Vars', 'Triggers' (active), 'Stack', and 'bitrise.yml'. Below the navigation bar, there are three tabs: 'PUSH', 'PULL REQUEST' (active), and 'TAG'. A '+ ADD TRIGGER' button is visible. Below this, a trigger is configured with 'SOURCE BRANCH' set to '\*' and 'TARGET BRANCH' set to 'master'. An arrow points from this configuration to a green box labeled 'Workflow primary'. A trash icon is on the right. Another '+ ADD TRIGGER' button is at the bottom.
